

Geometry  
Skill 1-15C

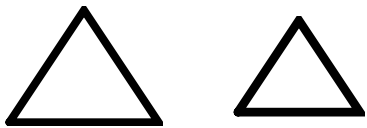

**Congruent Shapes**

Congruent shapes have the same size and shape.

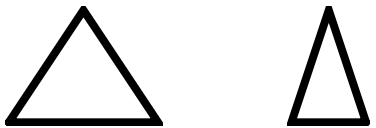

Examples

The shapes above are congruent. (same size, same shape)

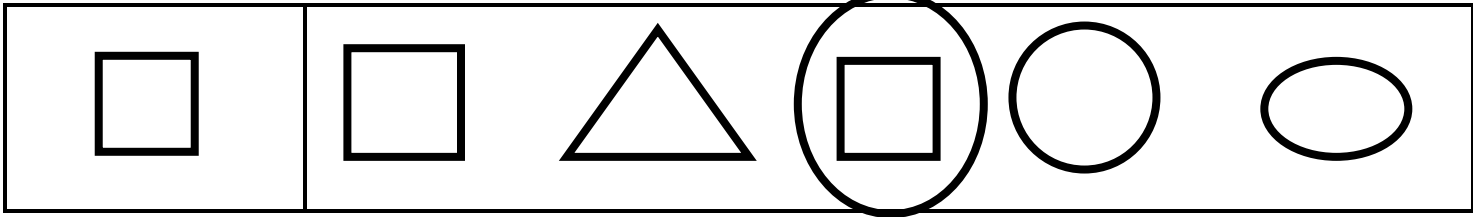

These shapes are not congruent. Same shape but different size.

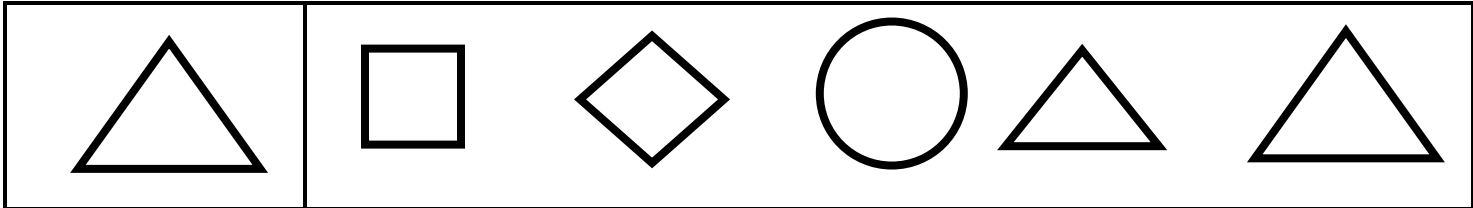

These shapes are not congruent. (not the same shape)

**Directions:** In each row, the first shape is in a box. Find the shape that matches (same size, same shape) the first shape and circle it. The first one is done for you.
